Supported Platforms for Alfresco Workdesk 4.1.x

Here is a list of the individual components that have been through the complete Alfresco Quality Assurance and Certification activities. Choose a combination of products to build your own Supported Stack.

ECM Repositories	4.1.0.0	4.1.1.0	4.1.1.1	Comment
CMIS 1.0 compatible repositories	✅	✅	✅	Tested with Alfresco Enterprise 4.1.0, 4.1.3, 4.1.4 Tested with Alfresco Community 4.2c Tested with IBM FileNet P8 5.1
IBM FileNet P8 5.x (native)	✅	✅	✅	Tested with IBM FileNet P8 5.0 Tested with IBM FileNet P8 5.1

Server OS	4.1.0.0	4.1.1.0	4.1.1.1	Comment
Microsoft Windows Server 2003	✅	✅	✅	
Microsoft Windows Server 2008	✅	✅	✅	
Ubuntu Linux 12.04 LTS	✅	✅	✅	

- As a Java based Web-Application Alfresco Workdesk generally is independant from the operating system and should run on any plattform as long as executed in one of the supported Web-Application Servers.

Database	4.1.0.0	4.1.1.0	4.1.1.1	JDBC Driver

IBM DB2	✅	✅	✅	Tested with: - db2jcc.jar - db2jcc_license_cu.jar
Microsoft SQL Server	✅	✅	✅	Tested with sqljdbc.jar
MySQL	✅	✅	✅	Tested with mysql-connector-java-5.1.17-bin.jar
Oracle	✅	✅	✅	Tested with ojdbc14.jar
PostgreSQL	✅	✅	✅	Tested with postgresql-9.1-902.jdbc4.jar

- Alfresco Workdesk can run without a database connection. A JDBC connection and a single database table is required for each of the following options:
  Role management
  Additional audit history
  Persisting of personal preferences
  Anyways, the database vendors from the table above have been tested by QA (using the jdbc driver from the comment column) and there are corresponding scripts provided with any Alfresco Workdesk release to create the required databases and tables for those vendors..

Application Server	4.1.0.0	4.1.1.0	4.1.1.1	Comment
IBM WebSphere 7.0.0.x	✅	✅	✅	Tested with 7.0.0.3 Tested with 7.0.0.29
IBM WebSphere 8.0.0.x		✅	✅	Tested with 8.5.5.0
Oracle WebLogic 11g	✅		✅	Tested with 10.3.5
JBoss 5.1.x	✅			Tested with 5.1.0.GA
JBoss 6.1.x		✅	✅	Tested with 6.1.0

JBoss 7.1.x		✅	✅	Tested with 7.1.1
Apache Tomcat 6.0.x	✅	✅	✅	Tested with 6.0.35
Apache Tomcat 7.0.x	✅	✅	✅	Tested with 7.0.33 Tested with 7.0.41

Browser	4.1.0.0	4.1.1.0	4.1.1.1	Comment
Internet Explorer 7	✅	✅	✅	Because of poor JavaScript performance we recommend using a later version of IE.
Internet Explorer 8	✅	✅	✅	Use 32-bit versions only, as 64-bit versions can cause issue with email attachment applet component. See issue OWD-3487!
Internet Explorer 9	✅	✅	✅	Use 32-bit versions only, as 64-bit versions can cause issue with email attachment applet component. See issue OWD-3487!
Internet Explorer 10		✅	✅	
Safari 6 (Mac OS)*	✅	✅	✅	Tested with version 6.0.2, 6.0.5
Google Chrome (Mac OS)*	✅	✅	✅	Tested with version 24.0.1312.56, 27.0.1453.116

Google Chrome (Windows)	✅	✅	✅	Tested with version 25.0.1364.172, 27.0.1453.116 m
Mozilla Firefox ESR 10	✅			Tested with version 15.0.x Tested with version 16.0.x
Mozilla Firefox ESR 17	✅	✅	✅	Tested with version 17.0 Tested with version 18.0.2 Tested with version 19.0.2 Tested with version 20.0 Tested with version 21.0 Tested with version 22.0
Mozilla Firefox ESR 24			✅	Tested with version 24.0

Client OS	4.1.0.0	4.1.1.0	4.1.1.1	Comment
Windows XP	✅	✅	✅	
Windows Vista	✅	✅	✅	
Windows 7	✅	✅	✅	
Mac OS from 10.7.5 *	✅	✅	✅	Tested with version 10.7.5

* No Java applet support!

Client API	4.1.0.0	4.1.1.0	4.1.1.1	Comment
JRE 1.6	✅	✅	✅	Tested with 1.6.0_39
JRE 1.7		✅	✅	Tested with 1.7.0_21

Server API	4.1.0.0	4.1.1.0	4.1.1.1	Comment
JDK1.6	✅	✅	✅	Tested with 1.6.0_26, ...
