

Senior Java Developers or Architects

Job Type:	Permanent Full-Time
Department:	Engineering
Time Zone:	GMT0
Location:	Maidenhead, UK
Reporting To:	VP of Engineering
Start Date:	ASAP

About Alfresco

Alfresco is the leading open source alternative for enterprise content management. It couples the innovation of open source with the stability of a true enterprise-class platform. The open source model allows Alfresco to use best-of-breed open source technologies and contributions from the open source community to get higher quality software produced more quickly at much lower cost.

Job Description

We are looking for senior Java developers or architects with significant experience of developing enterprise or internet scale applications. Both server and UI developers are needed, educated to graduate level. Experience with Spring, Hibernate, Lucene, JSF and AJAX technologies are highly desirable. The positions are permanent, with benefits that include private healthcare and stock options. We have flexible work arrangements, but developers will normally spend at least 2 days a week in the Maidenhead office.

Technical skills

Essential skills

- J2EE
- AJAX for UI developers

Desirable skills

- Understanding of Enterprise Content Management
- Experience with Hibernate, Spring Aspect-Oriented Framework and the Lucene Text Search Engine
- Understanding of one or more relational databases
- Knowledge of JSR170, JSR-168 Portlet Specification, JSR-127 Java Server Faces, YUI

Freedom to act

This role will report to the VP of Engineering, although it is expected that the individual will work largely independently and need minimal supervision.

Travel

Some travel may be required for this role
