

The Open Source Alternative for
Enterprise Content Management

Company Details

- ❖ Union of Qwiz, ePredix and PDRI
- ❖ Provides pre-employment assessments that help employers identify top performers
- ❖ 25,000 clients worldwide, many in the FORTUNE 500

Industry

- ❖ Employer Services

Business Challenges

- ❖ A robust document management system
- ❖ Ease of rollout around the world
- ❖ Comprehensive functionality
- ❖ Audited, controlled document lifecycle support
- ❖ Flexible licensing model
- ❖ Open Source technology to leverage in-house development team

Technical Challenges

- ❖ Replace existing Intranet with Alfresco
- ❖ Rapidly replace existing “mini-apps” with Alfresco SmartSpaces
- ❖ Integrate to Active Directory
- ❖ Provide a single integrated platform for Intranet and partner/client Extranet
- ❖ Document lifecycle support through Intranet to Extranet accessed by web applications

Alfresco Case Study: PreVisor

Robust, Global Document Management System

PreVisor, the union of Qwiz, ePredix and PDRI, helps employers identify top performers. With a history dating back to the 1960's, PreVisor has gathered mountains of empirical data correlating pre-employment assessment scores to performance. Leveraging this data and decades of industrial-organizational psychology research, PreVisor develops pre-employment assessments that accurately predict on-the-job performance. PreVisor's award-winning content, consulting and solutions, support hiring decisions and maximize performance for 25,000 employers worldwide.

Business Challenges

PreVisor was looking for a robust document management system that would be easy to implement and deploy to many different locations around the world. They also needed a comprehensive solution with full document lifecycle support, giving the users the ability to create, edit, approve and distribute their own documents in both an Intranet and Extranet environment. Additionally, flexible licensing and open source technology were important to implement the company's strategy to use in-house development resources.

“I looked at dozens of different Document Management Systems over six months and none hit our sweet spot until Alfresco. The application looks and behaves beautifully and intuitively.”

Bill Bailey
Manager, Corporate Business Systems

Integrating Alfresco across a Secure Intranet and Extranet

PreVisor needed to replace their existing Intranet. In addition, other ‘mini-apps’, such as a searchable Request for Proposal (RFP) database, needed replacing.

PreVisor will be integrating Alfresco into Active Directory and into their partner and client “Extranet”. This is a single integrated platform for Intranet and Extranet that allows secure document lifecycles to start in the Intranet and result in a finished document residing in a partner, Extranet Space, accessed by a web application. In addition, PreVisor's RFP database functionality will now be provided by customized Alfresco SmartSpaces.

The Benefits of Using Alfresco

- Source-control and version control for all corporate documents offering a full audit trail
- Collaborative environments for document development and delivery across the Intranet and Extranet

Benefits

- ❖ Control of all corporate documents
- ❖ Collaborate environments for document development and delivery
- ❖ Ease-of-use
- ❖ Ease of rollout globally
- ❖ Single integrated ECM for Intranet and Extranet

Why Alfresco

- ❖ Superior functionality and usability
- ❖ Ease-of-use and intuitive design
- ❖ Flexible pricing model
- ❖ Open source
- ❖ Quality of support

- Ease-of-use enabling rapid rollout and reduced training
- Ease of rollout Globally
- Single Integrated Enterprise Content Management Architecture

“PreVisor chose Alfresco because of its functionality and usability. The application is very intuitive and users find the system very easy to work with straight away.”

Bill Bailey
Manager, Corporate Business Systems

Why PreVisor Chose Alfresco

PreVisor chose Alfresco because of its functionality and usability. The application is very intuitive and users find it very easy to work with the system straight away. PreVisor was looking for an open source solution that would not tie it to a proprietary vendor and that had a flexible pricing model.

PreVisor was also impressed by Alfresco’s Support team and felt that Alfresco was the product that could address their requirements of ease- of-use, proven functionality, built on an open architecture.
