

Alfresco Community Network

Constant Innovation – Community Labs

The Alfresco Community Labs product is unsupported and intended for developers and technical enthusiasts in non-critical environments. Alfresco Community Labs has a daily build, offering the latest bleeding edge functionality. It serves as the research “labs” vehicle for new features and the platform for the Alfresco Community.

Alfresco Community is:

- Released Early and Often – Daily Changes with SVN Access
- Includes the Latest Bleeding Edge Features that are Under Development – Alfresco and Community
- Not Certified
- Wiki Access
- Public Forum Support
- No Bugs and Patch Support
- No Indemnity or Warranty
- No Alfresco or Certified Partner Support

Alfresco offers two methods to access the Alfresco product - Alfresco Community Labs and Alfresco Enterprise Edition.

The Alfresco Enterprise Edition is production ready open source - the stress-tested certified build that is supported by Alfresco Software Inc. The Alfresco engineering team wrote over 95% of the source code and is in a unique position to provide support to corporations and governments that require commercial Service Level Agreements (SLAs).

Alfresco Community Labs

- 100% Open Source
- Daily Build with SVN Access
- QA on Periodic Build on a Basic Open Source Stack
- No Scalability Testing
- No High-Availability Cluster Testing
