

Simple + Smart Solutions for Life Sciences with Alfresco

Life sciences organizations face growing challenges in all facets of their business. Global competition, industry regulations, operational efficiencies, and the need for external collaboration are driving a new set requirements in the industry. Using legacy ECM solutions to manage regulatory document management processes, and collaborate with external partners and agencies, no longer provides what organizations need to succeed in today's competitive market.

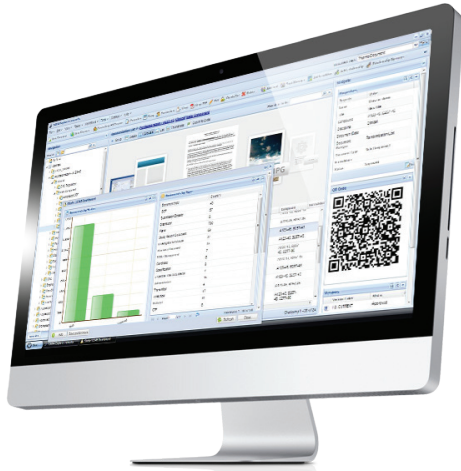

Alfresco for Life Sciences provides flexible architecture for rapid deployment with a configurable document management solution. Both internal users and external partners can collaborate with content securely in the cloud and on-premises to achieve regulatory compliance. Throughout the development stages, Alfresco delivers simple and smart solutions.

SOLUTION TYPE	Research & Development	Clinical eTFM	Quality & Manufacturing	Sales & Marketing

Alfresco partners have built secure solutions that meet the compliance needs of Life Sciences organizations. Using Alfresco's open platform, Generis and USDM Life Sciences provide simple to use solutions to control the full document lifecycle.

Alfresco has worked with many large healthcare organizations:

Generis-CARA for Alfresco

Generis CARA is an ergonomically designed, fast, web user interface and business rules engine. It is designed to facilitate the creation, review, approval and management of documents for life sciences customers. CARA provides additional functionalities to better manage controlled documents such as SOPs or complex documents like reports or submissions.

USDM Life Sciences

USDM Life Sciences is a leading global consulting firm focused on life sciences. USDM specializes in regulated business processes, with an emphasis on compliance and performance, that enable life science companies to achieve and maintain compliance across the entire enterprise.

— USDM Validation Accelerator Packs (VAPs)

- Application Specific
- Provide packaged, best practice framework
- Ensure FDA regulation compliance
- Minimize the cost of total compliance ownership
- Standardized and updated with product releases
- New VAPs in the Cloud

— USDM helps life science companies take advantage of lower validation impact while meeting FDA regulations

About Alfresco

Alfresco helps teams share, manage and retain content across the extended enterprise with simplicity that end users love and smarts that IT can endorse. Alfresco enables organizations in more than 180 countries to collaborate more effectively, improve business process efficiency and ensure information governance. Across cloud, mobile, hybrid and on-premise environments, Alfresco is smart enterprise content made easy. Founded in 2005, Alfresco is headquartered in Maidenhead, outside of London with U.S. headquarters in San Mateo.
